

SimaPro Classroom is a basic version of SimaPro for teachers and students. Up to 40 students can work on the same project and database simultaneously, and you can follow the progress of your students by logging in as a manager. Visit simapro.com to compare different licences.

Multi-user

SimaPro Classroom is a multi-user, client server network version for up to 40 users. All students can work in the same database simultaneously and cooperate within the same project or in their own projects. Passwords and user rights are easily allocated with the user creation wizard.

Quick results

If getting quick results is your main selection criterion, choose SimaPro Classroom. It was built to produce reliable results with limited effort. Powerful software wizards assist you and your students in managing complex tasks, while all results remain completely transparent.

Includes data and methods

SimaPro Classroom has all you need to get started right away. It includes a variety of methods and databases. With SimaPro Classroom, you can define how your life cycle assessment results are presented: per process, per product stage or per function.

Experience the full potential of SimaPro
